The home for Common Sense Cattle

Female
Production
Sale 2005
Simmental & Sim-Angus Cattle

Welcome to Sargeant Farms!

Welcome to the home for **“Common Sense”** cattle.

The cattle here at Sargeant Farms are bred from the ground up for real world producers demanding everyday function, fertility, longevity, reproduction, Maternal, growth and carcass merit. In addition to genetic supremacy, we also strive for phenotypic excellence. The cattle being offered fit our stringent selection process and we are confident that they will also fit yours.

David, Cindy & Howard

Our **“common sense”** approach has proven successful for us over the past 33 years as well as for many customers. As we celebrate the tradition of our cattle we are looking for an even brighter future. With this in mind, I think this may well be the best set of cattle we have ever offered. We are able to offer this high quality set because of the investment we have made in Embryo transfer, Artificial Insemination and selection of the best herd bulls and donor cows we can buy.

All of the bred females have been pregnancy checked and were called safe in calf to either the A.I. sire or to the pasture exposed dates; please refer to the breeding guarantee for further clarification. Prevention is the goal of our health program and we uphold a very rigorous vaccination program. In addition, the cattle have been ear notched tested for BVD and are all PI negative.

Thank you for taking time to peruse the sale catalog and we look forward to talking with you about the offerings. Feel free to call David or Cindy at the farm for more information. Otherwise, we will keep a seat warm for you on November 12th; all you have to do is keep your arm in the air and remember that the cattle in this outfit are from mothers that have made a living or were hauled off to town...no excuses, no special treatment, just good cow sense and good genetics.

Sincerely,

Howard Sargeant, Owner
David & Cindy Durheim, Managers

Sargeant Farms Breeding Guarantee

Dr. David Duxbury does our pregnancy testing work. He has tested a lot of females and does a tremendous job. Based on Dr. Duxbury's advice, our Breeding Guarantee is as follows: If you want to recheck the bred cows and bred heifers within 30 days after the sale, we will stand behind any individual female that is not examined safe in calf. After the 30 day period all pregnancy guarantees are waived. This is actually a better deal for the purchaser. This way if any calves are knocked out in transit from our place to yours, you have a means to be compensated.

Sargeant Farms reserves the right to collect 250 units of semen, collected at our expense and at the buyer's convenience for in herd use only.

See you at the sale!

SELLING CHOICE of HEIFERS – Full Brother Also Sells!

5097 and 5116 are full siblings out of Powerline. 5097 is a solid red female that is explosive across her top and has great depth and spring of rib. 5116 is a solid black female that follows the pattern of her sister. You can choose either the black one or the red one. We will be happy to keep the other! 5117 is the only full brother to 5097 and 5116. He follows their makeup and is made similar. This mating was one that we were very excited to have planned and we have waited anxiously to get the results. We are so please with it that we want to share the results with other breeders.

Lady Sarge Rebecca R5120

Polled Black Purebred ASA#Pending
 BD: 3-2-05 Tattoo: R5120 Act. BW: 70 Act. WW: 578

SELLING CHOICE!

Reba and Rebecca are just what we wanted when we mated 5001 to Black Perfector. These two heifers are phenotypically fault free and very similar in their make up. Reba and Rebecca are both wide based and thick bodied. Rebecca was a little smaller at birth and has a poorer recip but has caught up since weaning. Buy with confidence here, you choose one and Sargeant Farms will keep the other.

Sargeant Farms Breeding Guarantee

Dr. David Duxbury does our pregnancy testing work. He has tested a lot of females and does a tremendous job. Based on Dr. Duxbury's advice, our Breeding Guarantee is as follows: If you want to recheck the bred cows and bred heifers within 30 days after the sale, we will stand behind any individual female that is not examined safe in calf. After the 30 day period all pregnancy guarantees are waived. This is actually a better deal for the purchaser. This way if any calves are knocked out in transit from our place to yours, you have a means to be compensated.

Sargeant Farms reserves the right to collect 250 units of semen on any bull in this sale, collected at our expense and at the buyer's convenience for in herd use only.

UNDERSTANDING and USING ASA's

by Wade Shafer, Ph.D., ASA Director of Performance Programs

API

The API evaluates sires being used on the entire cowherd (bred to both Angus first-calf heifers and mature cows) with a portion of their daughters being retained for breeding and the steers and remaining heifers being put on feed and sold grade and yield. All EPDs, with the exception of tenderness, are taken into consideration in this index.

To provide a barometer on how the API weights traits, I've calculated the average EPDs of our top 25 active sires for API.

Average EPDs for the top 25 API sires:

CE	WW	YW	MCE	MLK	STAY	CW	YG	MRB	API	TI
12(5)	21(95)	40(90)	8(10)	7(40)	17(5)	-8(70)	.0(50)	.12(30)	27(1)	17(50)

Percentile rank among actives sires is in parenthesis.

As you can see, the API puts heavy emphasis on bulls with good STAY (an estimate of the likelihood of a bull's daughters staying in the herd). This should come as no surprise; research has consistently shown that reproduction trumps all else in economic importance. STAY improves your bottom line by lessening the need for replacement females. Reducing your requirement for replacements allows you to market more young, high-value females, cuts your costs for heifer development and changes your herds age structure so a larger portion of your females are in their most productive years (5 through 10).

Direct and maternal calving ease also get substantial weighting in the API. This is because they are strongly associated to calf survivability and, to a lesser degree, female longevity. Given that milk is essentially neutral in the index (the top 25 API bulls are only in the top 40% for milk), we can conclude that the benefits of increased weaning weight due to milk is negated by the additional cost associated with increased milk production.

It may be difficult for breeders to accept that the API places downward selection pressure on growth, as it is counter to the direction taken in most breeding benefit of increased growth in other areas of the system. Even so, the API is evidently finding sires with more carcass weight than would be expected given their growth potential. (The top 25 average in the 95 and 90th percentiles for weaning and yearling weight, while reaching the 70th percentile for carcass weight.)

From the top 25, it is evident that more weight is placed on marbling than yield grade. This is likely because there is no financial incentive to improving yield grade unless there is a problem (i.e. yield grades reach 4); for the most part, due to Simmentals superior yielding ability, SimAngus halfbloods see few discounts for yield grade.

TI

The TI is designed for evaluating sires' economic merit in situations where they are bred to mature Angus cows and all offspring are placed in the feedlot and sold grade and yield. Consequently, maternal traits such as milk, stayability and maternal calving ease are not considered in the index.

Suggested Sale Terms and Conditions American Simmental Association (Revised 3/88)

"The following suggestions are offered as possible terms and conditions of sale to be agreed upon before the sale of Simmental/Simbrah cattle. It recognizes that these suggestions may not be mutually agreeable and are not intended as a substitute for competent legal advice."

"The American Simmental Association makes no warranties, either expressed or implied, as to their applicability to any member's individual situation."

BIDDING AND APPLICABLE LAW:

All cattle listed in this offering comply with prevailing sale terms and conditions as set forth by the laws of the state wherein the sale is conducted. There are no warranties, expressed or implied, by either the auctioneer or consignor, except as set forth herein, as to the merchantability of fitness for any particular purpose of any animal offered in this sale. The right to bid or the right to reject the final bid, if done before the hammer falls, is reserved for all sellers unless otherwise announced from the sale block or as prohibited by law in the state wherein the sale is being conducted.

ANNOUNCEMENTS:

Any change of information other than that listed in the catalog will be announced from the auction block and such announcements shall take precedence over printed material. All statements made from the auction block or those made by the seller (in private treaty) must be documented by seller if requested by the buyer at time of sale.

TERMS:

Terms of sale are cash unless satisfactory credit arrangements have been made with the seller previous to the sale of any animal so affected.

PURCHASER'S RISK:

Each animal becomes the property of and therefore is also the risk of the purchaser as soon as it is sold; except it shall be the obligation of the seller to see that animals are fed and cared for free of charge to purchaser, until loaded for shipment or until the expiration of twenty-four (24) hours after the sale, whichever occurs first.

HEALTH REQUIREMENTS:

1. All cattle entered for sale must meet the health regulations of the state in which they are sold. All other agreements regarding the health of the animal will be between the buyer and the seller and should be documented in writing.
2. If sale cattle are returned to the seller for an adjustment, they must meet the health requirements of the state they are returned to.

CERTIFICATE OF REGISTRY:

Each animal which is catalogued, offered and sold as a registered animal shall have a certificate of registry available at time of sale. When an animal is sold as "eligible for registry" or "registry applied for", the seller shall be responsible for obtaining the certificate of registry and for the proper transfer of the certificate to the purchaser including full payment of transfer fees.

IDENTIFICATION:

Each animal at time of sale must have a readable tattoo or brand corresponding to that shown on the certificate of registration.

AUTHENTICITY OF PEDIGREE:

When an animal, through blood-typing, is determined to have an ancestry other than that reported on the registration certificate, the buyer shall be entitled to a refund of the purchase price from the seller upon the return of the animal to the farm of the seller at the seller's expense. The animal in question, at the buyers option, may be exchanged for another animal of equal value, or if agreeable with the buyer, the seller may have the certificate of registry corrected at the seller's expense with the corrected certificate returned to the buyer. Any adjustment provided herein, if selected, shall also absolve the seller from further liability for authenticity of pedigree to the buyer.

BREEDING GUARANTEES AND DEFINITIONS:

1. Females are guaranteed to be breeders, with the exception of:
 - a) Females calves sold at side of dam
 - b) Injury or disease occurring after time of sale
 - c) Gross negligence or willful misconduct on the part of the purchaser
 - d) Females used in ovum transplant after time of sale
 - e) Females shown competitively after time of sale
 - f) Cows sold with calf at side or a female that calves after sale to a breeding prior to the date of sale
2. Bulls are guaranteed to be breeders (defined as the ability to settle healthy cows by the time the bull is 18 months of age) with the exception of:
 - a) Bull calves sold at side of dam
 - b) Injury or disease occurring after time of sale
 - c) Gross negligence or willful misconduct on the part of the purchaser
 - d) Bulls shown competitively after time of sale
3. Any guarantees with respect to the ability to freeze semen shall be made by separate agreement between the buyer and seller.
4. Safe in calf females are females that have been diagnosed pregnant by a competent veterinarian, and are pregnant at time of sale.
5. A bred female is a female known to have been serviced by a bull either by natural breeding or artificial insemination, but it does not necessarily mean that the female is safe in calf to that service.
6. A pasture-bred female is a female that has been pastured with a designated bull and has been exposed for the time stated, but it does not necessarily mean that this is safe in calf to that bull.
7. An open heifer is a virgin heifer that has never been exposed to a bull either through

natural service or artificial insemination.

8. An open cow is a cow that has not been exposed to a bull either through natural service or artificial insemination since the birth of her last calf.

9. Calves sold off their dams (split pairs) shall carry the full breeding guarantee.

PRIVILEGE OF PURCHASER TO EXAMINE:

The purchaser of a female animal may have her examined within twenty-four (24) hours after the fall of the hammer and prior to removal from sale premises. The pregnancy status or breeding status of any female so examined, when found not to be as represented at the time of the sale, is cause for the female to be returned to the seller as unsold.

EMBRYO TRANSFER:

1. Seller should provide upon request a complete history of embryo transfer activity for any female offered for sale.
2. Withholding information on the existence of frozen embryos at the time of sale would be considered an unethical practice.

HORNED-SCURRED-POLLED DEFINITIONS AND GUARANTEES:

DEFINITIONS:

1. **HORNED** -- An animal with a horn growth affixed to the skull that has or has not been removed.
2. **POLLED/SCURRED** -- An animal with rudimentary horn growth that will not develop into a horn. The rudimentary horn growth may or may not become affixed to the skull at an older age.
3. **POLLED** -- An animal with absence of horn growth. (An animal can have scurs and still be genetically polled.)
4. **SMOOTH POLLED** -- A smooth-polled individual has no scurs and does not develop scurs later in life.

GUARANTEES:

1. If an animal is sold as polled or polled/scurred and proves to be horned, the seller shall be obligated to refund the purchase price upon the return of the animal to the farm of the seller at the expense of the seller or may be exchanged for a polled animal of equal value, whichever is acceptable to the buyer. The buyer has thirty (30) days from the date of sale to notify the seller that an adjustment is in order.
2. If an animal is sold as smooth-polled and proves to be scurred, the seller shall be obligated to refund the purchase price upon the return of the animal to the farm of the seller at the expense of the seller or at the buyer's option be exchanged for another smooth-polled animal of equal value.
3. If an animal is sold as polled and develops scurs, the seller will not be obligated to make any adjustments as a scurred animal is considered polled.
4. If an animal is sold as polled and has scurs, it shall be announced at the time of sale that the animal has scurs. If it is not announced and the buyer finds before the animal leaves the sale premises that the animal has scurs, the buyer must notify the seller of the findings. The seller shall then be obligated to refund the purchase price.

OPTIONS AND PRIVILEGES OF RETURN OR ADJUSTMENT:

The following adjustments do not preclude the right of the buyer and seller to mutually agree upon other terms and conditions for settlement of any dispute.

1. All claims for adjustment or refund must be made in writing either within six (6) months from the date of sale or no later than when the animal reaches 24 months of age, whichever occurs later, with the exception of claims involving the misrepresentation of service sire or as otherwise provided herein.
2. In the event an animal is claimed to be a nonbreeder, the animal may be returned to the farm of the seller, at the buyers expense, if in good physical condition, and the return is in compliance with the health requirements of the seller's state. The seller shall be entitled to a six (6) month trial period following the return of the animal in which to prove that the animal is a breeder. If at the end of six (6) months the seller is unable to prove the animal is a breeder the seller shall, at the option of the buyer, replace the animal with another of equal value or refund the purchase price. Either option shall be deemed full satisfaction and settlement.
3. If a female is sold as "safe in calf" to a given sire or sires on a specific date or dates and proves not to be as represented, the buyer is entitled to a refund of the purchase price from the seller upon the return of the animal and resulting progeny thereof to the farm of the seller at the seller's expense.
4. If a female is sold as "open" and proves to be with calf at the time of sale and examined pregnant within sixty (60) days after the sale, the buyer may return the animal to the farm of the seller prior to calving for refund of the full purchase price or for another animal of equal value, whichever is acceptable to the buyer. It shall be the obligation of the seller to bear any expenses incurred for transportation of the animal in question to the farm of the seller.

LIMITATIONS OF OBLIGATIONS:

1. If the aforementioned suggested terms and conditions are adopted, they should constitute a contract between the buyer and the seller for each animal sold under these terms, and as such, should be binding upon both parties. Animals resold following purchase in a sale shall constitute a separate transaction and the privileges and obligations of the original two parties connected thereto are not covered by the terms and conditions of the sale.
2. The American Simmental Association, its directors or employees are not in any way responsible or liable for enforcing the suggested terms and conditions of any agreements involving transactions between buyers and sellers.
